EDUCATION

Wake Forest University School of Business, Winston-Salem, NC

Master of Science in Business Analytics – Sports Analytics Concentration, May 2027

University of Notre Dame, Notre Dame, IN

Bachelor of Arts in Business Analytics and History, May 2026

Minors: Finance; Sport, Media, and Culture; Business and the Common Good; Business Honors Program

Honors: Summa Cum Laude, Dean's List, Monogram Club Inductee, Beta Gamma Sigma, Scott Scholar, O'Hara Scholar

AREAS OF EXPERTISE

Sports Analytics | Communication | Time Management | Cross-functional Collaboration | Stock & Portfolio Evaluation | Data Visualization

Statistical Analysis | Leadership | Stakeholder Engagement | Data Reporting | Adaptability | Data Analysis | Active Listening | Data Collection

Player Optimization | Project Management | Analytical Interpretation | Financial Modeling | Investment Analysis | Report Generation

TECHNICAL SKILLS

Data Visualization: Tableau, PowerBI, Excel

Programming Languages: R, SQL, Python

Predictive Modeling & Statistical Analysis: Linear Logistic Regression, Time Series Modeling, Clustering Analysis

Machine Learning: XGboost Modeling, Random Forest Modeling

Baseball Specific Technologies: Trackman, Trajekt, Edgertronic, BATS, Synergy, Rapsodo, TruMedia

Miscellaneous Tools: Microsoft Office Suite, Google Colaboratory

PROFESSIONAL EXPERIENCE

Graduate Baseball Analyst | **Wake Forest Baseball** | Winston-Salem, NC

July 2026 – Present

- Collect data via Trackman, Edgertronic cameras, BATS, KinaTrax, and other baseball-related technologies and implement into the creation of player performance modeling/future performance forecasting
- Analyze statistics with SQL and R to prepare scouting reports, assist in recruiting evaluations, and aid in player development

Varsity Baseball Student Manager | **Notre Dame Baseball** | Notre Dame, IN

August 2023 – May 2026

- Organized practices, coordinated equipment, fed pitching machines, gathered baseballs during batting practice, and caught bullpens
- Operated various technologies such as Radosodo, Trackman, Edgertronic cameras, and Bats during practice and games to capture data for use in player evaluation modeling and report generation

Baseball Strategy and Information Intern | **Los Angeles Dodgers** | Los Angeles, CA

May 2025 – August 2025

- Completed scouting reports and ad-hoc projects utilizing SQL and R to aid the coaching staff and front office personnel
- Trained Trajekt to prepare players for opposing pitchers and recorded bullpens/simulated games via Trackman

Tacoma Rainiers Baseball Club (Seattle Mariners' AAA Affiliate) | Tacoma, WA

Public Relations Intern, May 2021 – August 2024 | Bulpen Catcher, June 2022 – August 2022 | Job Shadow, April – August 2019

- Wrote game summaries/game notes and biographies, conducted player interviews, and analyzed statistics for use in print media
- Helped warm up pitchers before and during games, played catch with outfielders, and helped with miscellaneous tasks
- Shadowed members of the Public Relations/Media, Sales, Strength and Conditioning, Athletic Training, and Creative and Marketing Departments (which also supported the Tacoma Reign and Tacoma Defiance in 2019)

LEADERSHIP & ACTIVITIES

Student Baseball Analyst | **Notre Dame Sports Analytics Club** | Notre Dame, IN

September 2022 – May 2026

Student Member | **Undergraduate Investment Club** | Notre Dame, IN

October 2022 – May 2024

Travel Team Member | **Student International Business Council (SIBC)** | Notre Dame, IN

October 2022 – May 2024

Sportswriter | **The Observer Student Newspaper** | Notre Dame, IN

January 2023 – May 2023

ANALYTICAL PROJECT EXPERIENCE

K-Means Clustering Curveball Analysis: Analyzed curveball data from the 2024 MLB season, employing nine statistics to group pitchers into eight clusters, investigating what separates elite pitchers (with attention to pitcher handedness) from their counterparts.

NFL Sports Betting Predictive Analysis: Investigated NFL Play-by-Play and Schedule Data from 2010-2025 to create linear regression, lasso regression, random forest, and XGboost models to attempt to predict NFL games, particularly with respect to the money line and spread of respective NFL games. Selecting the XGboost model, successfully picked outcomes and spreads approximately 75% of the time.
